

ENVIRONMENTAL POLICY

Affinity Offshore Limited is committed to preventing any environment impact arising from the work it carries out, either directly or indirectly.

In order to achieve this, a philosophy of continuous review and assessment of impacts and related work methods will be established, to allow the Company to identify opportunities to continually improve their environmental performance.

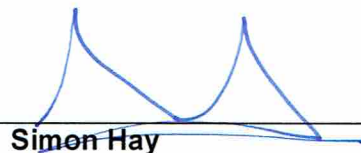

The main environmental aims of the Company are to prevent pollution minimise and/or to the environment by:-

- Compliance with requirements of relevant environmental legislation and approved codes of practice
- Assessment of the environmental impact of all current and future operations
- Continuously seeking to improve environmental performance
- Reducing pollution, emissions and waste
- Reducing the use of all raw materials, energy and supplies
- Raising awareness, encouraging participation and training employees in environmental matters
- Assisting customers to minimise environmental impact through reduced carbon footprint

To help us to achieve these aims, an Integrated Management System is implemented. Management will continuously evaluate the performance of this system.

Responsibility for establishing and implementing this Policy rests with the Managing Director.
